

Protecting Those Who Protect Us

MopUp Marketing and Sales Solutions, LLC – Capabilities Statement

PFAS Remediation | Firefighting Equipment Decontamination | Environmental Communications

DBA: MopUp Solutions

COMPANY OVERVIEW

MopUp Solutions specializes in PFAS remediation, decontamination, and public-facing environmental communication services. MopUp delivers on-site PFAS destruction services for AFFF-containing firefighting equipment and vehicles, while also supporting agencies with community education, public health communication, and stakeholder outreach related to PFAS contamination and remediation projects.

CORE COMPETENCIES

- PFAS removal and destruction from AFFF-containing firefighting vehicles and equipment
- On-site decontamination of foam tanks, piping systems, and associated components
- Mobile PFAS destruction services with validated performance metrics
- Environmental operations aligned with safety and regulatory requirements
- Community education and public health communication related to PFAS contamination
- Public-facing communication for PFAS remediation and cleanup projects
- Program and project management, logistics, and operational reporting

DIFFERENTIATORS

- PFAS destruction technology demonstrated with Environmental Security Technology Certification Program (ESTCP) at Tyndall Air Force Base, achieving rapid and verified PFAS destruction from firefighting vehicle system
- Prime contractor-led remediation delivery model, with MopUp accountable for project planning, on-site coordination, execution management, and integration of specialized technology and environmental service partners.
- Single accountable point of responsibility for PFAS decontamination, reducing interface, safety, and compliance risk while aligning execution and reporting with installation-level requirements.
